

# Introducing The J-1000 Series Circular Dichroism Spectrometers

By Kristen Burkhardt / June 9, 2013

# JASCO continues to revolutionize the characterization of biomolecules

## NEW! J-1000 Series Circular Dichroism Spectrometers

JASCO is pleased to announce the new J-1000 Series CD Spectrometers offering unparalleled sensitivity, with reach from the vacuum UV to the NIR wavelengths. Also, introducing Simultaneous Multi-Probe Spectroscopy (SMP) which consists of three modes (CD, LD and Absorbance) running concurrently with the option to run Fluorescence, Anisotropy, ORD, Temperature, Kinetics and more!

New models for the measurement of Circular Dichroism include:

- · J-1100 CD Spectrometer designed for routine conventional CD applications
- J-1500 CD Spectrometer designed as a multi-purpose system with a wide dynamic range

JASCO has been the leading manufacturer of CD, VCD and other chiro-optical instrumentation since the 1960s. With offices and dealers worldwide we are able to provide the research community with quality products and experienced support for any application. For more details, please visit JASCO at <a href="www.jascoinc.com">www.jascoinc.com</a>, email us at <a href="mailto:sales@jascoinc.com">sales@jascoinc.com</a>, call 800-333-5272, or mail 28600 Mary's Court, Easton, MD 21601.
